EDUCATION

King Mongkut's University of Technology North Bangkok	Bangkok, Thailand
Bachelor of Science (B.Sc.)	2023 - Present
- Major : Computer Science - GPA: 3.60 - Relevant Courses : Generative ai, Machine Learning, Intelligent Systems, Software Engineering , Database Systems, Algorithms, Object-Oriented Programming, System Analysis & Design, Penetration Testing & Protection, Mobile app Development	

PROJECTS AND ACTIVITIES

Forex Robot Trading	December 2025 - Present
- Developed an AI-driven automated trading system integrating LLMs, reinforcement learning (RL), and multimodal models (e.g., CLIP) to analyze numerical market data, textual context, and price chart images. - Utilized LLMs for strategy reasoning and decision validation, and trained RL agents to adapt trading policies under dynamic market conditions.	
Acute Kidney Injury (AKI) Risk Prediction	October 2025
- Developed machine learning models to predict acute kidney injury (AKI) using real-world clinical data, classifying patients into No-AKI and AKI stages 1–3. - Achieved 66% F1-score and 0.83 accuracy for AKI vs No-AKI classification by ensembling LSTM, XGBoost, and Random Forest models to improve prediction robustness.	
SmartQ – Smart Queue Management System	November 2025
- Built a real-time, cross-platform smart queue system for medical services with Thai Smart Card, NHSO, and JHCIS integration, supporting instant eligibility checks and queue synchronization. - Implemented real-time updates via WebSocket and developed the system using Tauri, Rust, React, Java, Python (FastAPI), and MySQL.	
HexCode – Competitive Programming Platform (Group Project)	December 2024
- Developed a web-based competitive programming platform enabling users to solve coding problems with automated, sandboxed code execution using Judge0 open-source API and Docker-based isolation. - Built the frontend with Next.js and Tailwind CSS, implemented the backend using ElysiaJS, and managed data persistence with MongoDB, focusing on scalability and security.	
UKB-SHOP – Digital Resource E-commerce Platform	April 2024
- Developed a digital e-commerce platform for software scripts and resources with automated payments via SlipOK, JWT-based authentication, and IP-based access control. - Built an admin dashboard and full-stack system using Vue.js (frontend) and Express.js (backend), focusing on security and operational efficiency.	

ACHIEVEMENTS & ACTIVITIES

- Contestant, **ICPC Asia Bangkok Regional Contest 2025**, Chulalongkorn University.
- Teaching Assistant, **POSN Computer Olympiad Camp 2**, KMUTNB.
- Contestant, **goIT activities of the Computer Science Department 2023**.

TECHNICAL SKILLS

- Language** : C, C++, JavaScript, TypeScript, Python, Java, Dart, Golang, MySql, NoSql, Lua, HTML, CSS
- Framework & Libraries** : Bun, Nodejs, NextJs, ReactJs, VueJs, Svelte, FastAPI, ExpressJS, Gin, ElysiaJS , Nuxt, Flutter,Tailwind CSS, Prisma
- Machine Learning** : NumPy, Pandas, Scikit-learn, Keras, PyTorch, YOLO, Matplotlib, Ollama
- Databases** : PostgreSQL, MongoDB, MySQL
- Tools & Devops** : Docker, AWS, Linux, DigitalOcean , Vercel, Postman, Git, Github, Figma, Metasploit, Wireshark, Burp Suite
- Core Skills** : RESTful API Design, System Analysis & Design, Data Cleaning, Feature Engineering, Model Evaluation

MISCELLANEOUS

- Languages**: Thai (Native) , English (Basic)
